Professional Summary

Java Full Stack Developer with 6 months of hands-on internship experience at TAP Academy, building scalable web applications with Java, Spring Boot, Hibernate, JDBC, and MySQL. Delivered 10+ REST APIs using layered architecture and DAO design patterns, cutting API response time by 30% and database query latency by 40%. Seeking a Software Engineer or Graduate Engineer Trainee role to build clean, secure, and maintainable backend systems.

Technical Skills

Languages	Java (Core & Advanced), JavaScript
Backend	Spring Boot, Spring MVC, Hibernate ORM, JPA, JDBC, REST API
Core Java	OOP, DAO Pattern, Design Patterns, Exception Handling, Multithreading, Collections Framework
Frontend	HTML5, CSS3, JavaScript ES6+, Responsive Web Design
Databases	MySQL, Joins, Normalization
Tools	Git, GitHub, Maven, Postman, Eclipse, VS Code

Internship Experience

Java Full Stack Developer Intern — May 2025 – January 2026

TAP Academy, Bangalore, India

- Engineered 3 backend modules with Java and Spring Boot, cutting average API response time by 30% through optimized service-layer architecture.
- Delivered 10+ RESTful API endpoints via Spring MVC, connecting 4 frontend modules to the database layer with zero downtime during integration.
- Applied MVC, DAO, and Singleton design patterns across the codebase, reducing code duplication by 25% and improving peer review scores.
- Resolved N+1 query issues in 15 Hibernate ORM mappings using lazy loading and fetch strategies, improving data load speed by 35%.
- Automated Maven build configuration and validated 20 API workflows in Postman, achieving 100% test pass rate for all critical service endpoints.
- Completed 3 sprint releases on schedule within a 5-member Agile team, contributing to planning, reviews, and retrospective sessions.
- Managed source code across 2 projects on GitHub with feature branching, logging 50+ commits and maintaining a clean merge history.

Projects

Food Delivery Application [GitHub]

Java, Spring Boot, Spring MVC, Hibernate, JDBC, MySQL, REST API, HTML5, CSS3, JavaScript

- Architected a full-stack food delivery system with 6 modules: registration, menu browsing, cart, checkout, payment, and live order tracking.
- Exposed 12 API routes using HTTP methods (GET, POST, PUT, DELETE), decreasing client-server round trips by 20% versus a page-reload approach.
- Structured data access with a layered DAO architecture, lowering inter-module coupling by 30% and enabling independent testing per layer.
- Secured 100% of database interactions against SQL injection using PreparedStatements and server-side input validation rules.
- Accelerated 8 critical MySQL queries through composite indexing and JOIN refactoring, reducing retrieval time from 850ms to 510ms (40% gain).
- Programmed a cost-calculation engine processing 5 pricing variables (distance, item weight, tax, discounts, delivery fee) with 99% billing accuracy.
- Crafted a responsive frontend with HTML5, CSS3, and JavaScript, ensuring consistent rendering across mobile, tablet, and desktop breakpoints.

Hospital Management System [GitHub]

Java, JDBC, DAO Pattern, MySQL

- Developed a Java-based Hospital Management System to manage patient, doctor, and appointment records with complete CRUD operations.
- Implemented the DAO pattern over JDBC to separate data access from business logic, improving maintainability and testability.
- Designed a normalized MySQL schema with primary and foreign key constraints, and secured queries using PreparedStatements.

Education

Bachelor of Technology in Computer Science Engineering — **2022 – 2025**

Annamacharya Institute of Technology and Sciences, Kadapa | JNTU-A — *Score: 70.0%*

Diploma in Mechanical Engineering — **2019 – 2022**

Global College of Engineering and Technology, Kadapa | AP SBTET — *Score: 68.98%*

Secondary School Certificate — **2019**

ZPHS School Ganganapalli, Andhra Pradesh | Board of Secondary Education — *Score: 82%*
